An interesting experiment on "influence of plowing at different depths on soil temperature and moisture" is being conducted at the Oklahoma Experiment Station by Prof. Magruder. Forty plots of soil are plowed and sub-soiled 4, 6, 8, 10, 12, 14, 16, 18, 20 and 22 inches deep and will be planted to corn and oats. Temperature will be ascertained by soil thermometers and the moisture retained determined by evaporating the water from the soil samples taken from the plot.

GREAT ROCK ISLAND ROUTE. TO THE EAST. BEST DURING CAR SERVICE IN THE WORLD.

The Rock Island is foremost in adopting any advantage calculated to improve speed and give that luxury, safety and comfort that popular patronage demands. Its equipment is thoroughly complete with vestibuled trains, magnificent dining cars, sleepers and chair coaches, all the most elegant, and of recently improved patterns.

Faithful and capable management and polite, honest service from employees are important items. They are a double duty—to the Company and to travelers—and it is sometimes a task difficult of accomplishment. Passengers on this line will find little cause for complaint on that ground.

REMEMBER The Great Rock Island Route runs all regular trains to Englewood suburban station, close to World's Fair grounds, and you can save time and trouble by getting off at that point and avoid the crowd in the city.
